Our Innovations

Advanced Board Architecture
Designed for effortless lift-off and planing, our boards feature anti-dive hull properties and an integrated mast foot that minimizes resistance during touchdowns.

Custom Hydrofoil Geometry
Meticulously crafted and validated through CFD simulations, our hydrofoils feature custom geometry that improves efficiency and stability. Furthermore, our integrated 8 kW Direct Drive motor provides instant torque response, silent running, and improves handling.

Smart Battery Technology
Our batteries are among the largest and use premium battery cells borrowed from german automotive manufacturers. Our smart Battery Management System ensures the highest level of performance and safety, and allows for market-leading cloud-based status monitoring.

Seamless Connectivity
Our eFoils are equipped with a WiFi modem and a SIM card to ensure seamless communication between our servers and your boards. A GPS and an array of sensors collect telemetry data, which riders can view through the SiFly Apps after each session.

Commercial Software
The SiFly Apps provide cloud-based monitoring that enables business owners to manage their lucrative assets effectively. Track telemetry, download updates, time sessions, enforce power limits, place geofences, and set speed limits from anywhere.

Stellar *X*

Ride the edge.

75 l | 142 cm | 8.6 kg

As our smallest and most agile board, the Stellar X's only focus is wave riding and performance carving. Featuring a lightweight carbon construction and an innovative double concave hull, it offers unmatched hydrodynamic efficiency. Agile and responsive, the Stellar X is the most accessible perfomance eFoil on the market.

Stellar *S*

The ultimate carving machine. Redefined.

98 l | 161 cm | 10.6 kg

The Stellar S offers an exceptional balance of sportiness and control. Featuring the same carbon construction as the Stellar X, but with slightly more volume, it's inspires confidence and allows riders to explore the world of performance eFoils with a more forgiving, approachable ride.

Stellar *R*

The sweet-spot of electric hydrofoils.

120 l | 171 cm | 11.6 kg

The Stellar R is our premium family board, offering the perfect blend of usability, versatility, and performance. Balancing stability with agility, it delivers a controlled yet sporty ride in all conditions, supporting rapid progression for riders of any age or skill level. Cruise and carve on the world's easiest carbon eFoil.

Rider

Accessible performance.

110 l | 161 cm | 13.6 kg

Inspired by the Stellar S, the Rider is our affordable performance eFoil. With durable closed-cell foam and aluminum construction, it retains the same compact hull shape, delivering snappy turns and instant touchdown recovery. The Rider is the perfect choice for those looking for a performance board on a budget.

Rider*+*

A safe and comfortable cruiser.

130 l | 171 cm | 14.6 kg

Based on the Stellar R, the Rider+ is our affordable, midsized eFoil. Stable, durable, and safe, it is the go-to option for any family, school, yacht charter, or watersports center. With a shock-absorbing, soft-top construction, the Rider+ prioritizes beginner riders' comfort and safety.

Lite

Affordable. Portable. Fun.

110 l | 161 cm | 12.8 kg

The Lite is our compact inflatable eFoil, which offers a practical balance of stability and agility, making it easy to transport while still delivering a sporty ride. The modular design combines an inflatable outer sections with a rigid board core, providing impact absorption while maintaining a responsive hardboard feel underfoot.

Lite*+*

Stable. Spacious. Easy.

170 l | 190 cm | 14.2 kg

The Lite+ is the largest and most stable board in the SiFly range. Designed for maximum stability and easy learning, it's ideal for beginners, families, schools, and rental fleets. Like the Lite, it pairs an inflatable outer sections with a rigid board core, combining safety, durability, and confident performance on the water.

Floaty

Additional volume for easy learning.

3 Sizes Available

The SiFly Floaty is an inflatable ring designed to add extra buoyancy and stability to your SiFly board, making learning safe, fun, and accessible for all ages. Start with a smaller board equipped with the Floaty to build confidence, then remove it for a more dynamic ride as your skills progress.

EZ GO

eFoiling made easy.

CR 340 | CR 300

To make eFoiling even easier, we developed the EZ GO stabilizer. This patented auxiliary unit attaches onto the mast and prevents beginners from flying too high and breaching the water surface with the fuselage and wings, which oftentimes results in a fall. Attach it onto any SiFly hydrofoil and make riding a breeze.

Hydrofoil *V3*

The world's first adjustable hydrofoil unit.

75 cm | Jet Drive | Prop Drive

The Hydrofoil V3 is the world's most advanced unit, boasting interchangable drive options and an adjustable rear stabiliser. The Jet Drive ensures maximum safety and a silky smooth ride, while the Prop Drive delivers jaw-dropping performance and agility. Switch between sport and comfort mode in seconds.

Quick Mount System

The world's first fully collapsible hydrofoil unit.

75 cm | Jet Drive

The Quick Mount Mast is a fully collapsible system that separates into three parts for easy transport and storage. Setup and pack-down take just moments, letting you focus on the ride. Paired with the advanced Jet Drive, it guarantees maximum safety and a smooth, effortless experience on the water.
